

Ful-O-Pep Beef Limiter feeds are specially designed to help limit consumption where restricting intake is needed. Limiting source is with salt. Rule of thumb is a grown cow can eat 4# of salt a day. When using these rations on older cows and bulls, start with 7415 Limiter 15. This will acclimate the stock to the feed and subsequent loads you may go to the 7410 Limiter 10 until the desired consumption is reached. Maximum consumption is 2% of bodyweight.
